Extra Large Zipoc Bag33cm X39.6Labelled "Library"	1	1	1	1	1	1
1 package Band aids			1	1		
Small package of plastic spoons	1	1	1	1	1	1

Shoes used for physical activities need to be suitable for movements such as starting, stopping, changing direction, running, jumping and kicking.

When shopping, choosing athletic shoes, (running shoes or court shoes), is best!

Shoes need to fit well and be properly laced/velcroed to support your child's feet. Children should be able to perform a variety of movement skills without their shoes falling off.

Laces need to be the correct length.

Students with lace up shoes need to be able to tie and untie their laces independently.

Velcro fasteners must be of good quality.

Encourage your child to take care of their athletic shoes. Help them learn to undo laces/fasteners to put shoes on and off so the heel cup stays in good shape. Discourage them from walking on the backs of their running shoes.

What shoe issues may look like in the gym:

- *Shoes are too loose, or are broken down and fall off too easily.
- *Child doesn't know how to tie laces/ fasten shoes. Shoes may be left undone, laces may get tucked into shoes, or wrapped around ankles. Incorrect tying leads to stubborn knots and frustration.
- *Shoelaces or other fasteners do not stay tied/done up. More practice is needed, or the student is reluctant to take the time to tie laces/fasten shoes properly.
- *Laces are too long, or frayed.
- *Velcro fasteners are worn out.
- *High top runners are too difficult to manage.

Students need shoes that fit well and stay fastened through a PE class for their own safety as well as the safety of their classmates.

Also, skills progress much more quickly when footwear can be relied upon to support movement, not interfere with practice and play.

Thank you for helping to set your child up for success in PE!
